**The Stick Gripps Starter Kit contains everything you'll need to get started.**

Heat Gun, Rings, Sleeves and installation instructions

Please Note: Hair driers and disposable lighters are not recommended

Layout package contents

Rings

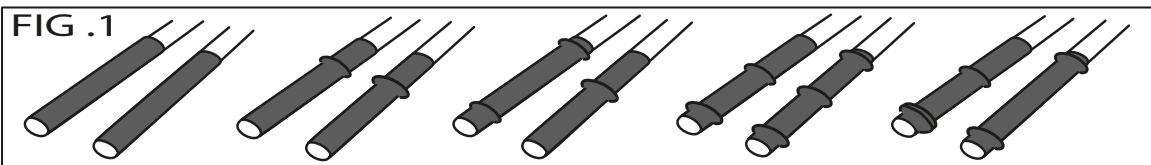

Sleeves

Heat Gun

**NOTE:** Use any ring configuration including sleeve only ie. **fig 1.**

For ring and sleeve only packs, refills or other products and services visit us @ [stickgripps.com](http://stickgripps.com)

**Ring configuration is all a matter of personal preference.**

**Step 1.** Place ring(s) around the sticks in desired location(s).

Test sticks with rings in your normal playing style, (avoid rimshots prior to finishing sleeve installation) Adjust or add rings as desired.

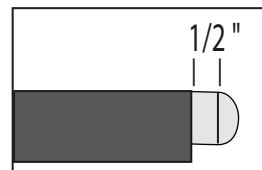

**NOTE: Straight & exact position of rings should be maintained during the following procedure, rings can not be moved after sleeve lock down.**

**Step 2.** Gently slide sleeve over stick & rings, Place sleeve 1/2" from stick bottom, ready for sleeve lock down.

**Step 3.** Hold stick & sleeve in hand at opposite end of Fig. 3

**Step 4.** Using maximum heat setting, point the heat gun 1/2" away from stick and start heating sleeve at bottom. Apply heat to sleeve while moving in circular motion like a screw driver, sleeve will lock down on stick and ring(s).

**FIG.3**

Stick Bottom

**Final Step...** Go slow enough to see complete reduction of sleeve, but fast enough not to burn the sleeve, once sleeve stops reducing **QUICKLY MOVE ON!** When lock down is complete, remove heat, **DO NOT TOUCH**, Let air cool for 2 minutes. **That's it!** If sleeve becomes loose over time, simply reheat.

Thanks for using Stick Gripps™
